

I for one cannot believe that the FCC is even entertaining the idea of pursuing XM satellite radio with this crap from the NAB (nasty ass bastards) Who are they to think they can dictate what I want to listen to. I gladly pay for this service because regular radio SUCKS!! I don't want to hear all the BS commercials that local radio has to play every 5 minutes to pay their bills. Hell if the NAB had their shit together they would have thought about satellite radio themselves but someone beat them to the draw. GOD BLESS XM radio and screw the NAB. ROCK ON XM

PS. I am calling for a full investigation as to what the supporters of this BS legislation are receiving in return for their support. Maybe a big cash advance for their reelection? perhaps their kids college education? or how about an all expense paid vacation to some exotic tropical location which the taxpayers will be paying for the airfare.
